**The majority of fatal accidents have these common root causes**

- Failure to identify hazards
- Failure to manage risks

## **SLAM Risks the SMART Way!**

### **Miners:**

<b>Stop</b>	Think through the task
<b>Look</b>	Identify the hazards for each job step
<b>Analyze</b>	Determine if you have the proper knowledge, training, and tools
<b>Manage</b>	Remove or control hazards and use proper equipment

### **Mine Operators:**

<b>Stop</b>	Isolate each step in a task and identify past and potential accidents, injuries, and violations.
<b>Measure</b>	Evaluate the risks associated with the task and barriers that have allowed hazards to cause injuries
<b>Act</b>	Implement controls to minimize or eliminate any hazards that make the risk unacceptable
<b>Review</b>	Conduct frequent work site visits to observe work practices and audit accidents, injuries, and violations to identify root causes
<b>Train</b>	Develop a human factor-based action plan and then involve and train the miners

**Make the RIGHT Decision!**
